Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary.

Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 1773

4. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by D'Errico et al (U. S. Patent 6,559,212 B1).

D'Errico et al disclose a plasticized butyral sheet comprising polyvinyl butyral having a hydroxyl content from 17 to 20.3 5 and 35 to 45 parts per 100 parts of polyvinyl butyral plasticizer triethylene glycol di-2-ethylhexanoate (Tables 1 and 2, col. 1, lines 45-55, claims). D'Errico et al's plasticized polyvinyl butyral sheet is useful for making a glass laminate for building and vehicle windows, show cases etc. (Col. 1, lines 9-19).

5. Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over D'Errico et al (U. S. Patent 6,559,212 B1) in view of Moran (U. S. Patent 5,091,258).

D'Errico et al, which has been discussed above in paragraph 4 suggest a glass laminate but do not show embodiment of the glass laminate.

Moran discloses a glass laminate for vehicle windows comprising two glass plates (9,11), plasticized polyvinyl butyral sheets (14,16). Moran discloses plasticized polyvinyl butyral sheet comprising polyvinyl butyral having 15 to 25% hydroxyl groups (Col. 5, lines 42-50) and plasticizer from 15 to 50 parts per 100 parts polyvinyl butyral resin (col. 5, lines 51-59).

Therefore it would have been obvious to a person of ordinary skill in the art at the time of this invention made to utilize disclosure of Moran in the invention of D'Errico et al to make a glass laminate for their disclosed applications. The glass laminate deemed to have some sound damping property unless shown otherwise. D'Errico et al's disclosure of showcases meets claim 26.

6. Receipt of Information Disclosure Statements filed October 2, 2006 and October 12, 2006 is acknowledged and all recited documents have been made of record.
